#### What are the key product risks?

##### Credit risk

This product is an insurance policy issued by FWD. The application of this insurance product and all benefits payable under your policy are subject to the credit risk of FWD. You will bear the default risk in the event that FWD is unable to satisfy its financial obligations under this insurance contract.

##### Liquidity risk

This product is a long term insurance policy. This policy of long term insurance will be made for certain determined term of years starting from the policy effective date to the policy maturity date. The policy contains value and, if you surrender your policy in the early policy years or before its maturity date, the amount you get back may be considerably less than the total premium you have paid. Application of the Plan may constitute the liquidity risk to your financial condition. You need to bear the liquidity risk associated with the Plan.

##### Exchange rate and currency risk

The application of this insurance product with the policy currency denominated in a foreign currency is subject to that foreign currency's exchange rate and currency risk. The foreign currency may be subject to the relevant regulatory bodies' control (for example, exchange restrictions). If your home currency is different from the policy currency, please note that any exchange rate fluctuation between your home currency and the policy currency of this insurance product will have a direct impact on the amount of premium required and the value of benefit(s) to be received. For instance, if the policy currency of the insurance product depreciates substantially against your home currency, there is a negative impact on the benefits you receive from the product. If the policy currency of the insurance product appreciates substantially against your home currency, your burden of the premium payment is increased.

##### Inflation risk

The cost of living in the future may be higher than now due to the effects of inflation. Therefore, the benefits under this policy may not be sufficient for the increasing protection needs in the future even if FWD fulfills all of its contractual obligations.

### Early surrender risk

If you surrender your policy in the early policy years or before the end of the benefit term, or withdraw the premiums you contributed in the early policy years, the amount of the benefit you will get back may be considerably less than the total amount of the premiums you paid. The Surrender Benefit which is expressed as a percentage of actual total premiums paid is payable if the Plan is surrendered before the maturity.

Surrender during the Policy Year	% of Actual Total Premium Paid	Surrender during the Policy Year	% of Actual Total Premium Paid
1	0%	9	40%
